

## NOTTE DIMOUT

Notte is a flameproof dimout fabric on double width. The fabric is double-woven with a black thread in the middle which gives the fabric its darkening properties where the right side has a matte linen-like structure and the back side is plain.

Fabrics with a dimout effect are also called darkening fabrics. These textiles obscure the light and are most often used in bedrooms. Our dimout fabrics can be used as main curtain or as a luxurious lining. Darker color makes less light coming through.

For best result use the width of the fabric as the width of the curtain.

Please be aware that screen colours, printer colours and fabric dye batches may vary.
