

## LAGO

Lago with a width of 340 cm is made in the flameproof fabric Trevira CS. The fabric is plain with a solid colouring and a matte surface that gives it a nice strict drape.

There is also a more transparent variant in the same colour scale called Como. However, the colours can be experienced differently due to the fact that Lago is denser and the colour may appear stronger. Shades well when in need of sun protection and privacy.

This fabric is suitable when fire safety, ease of care and colour durability are priorities.

Please be aware that screen colours, printer colours and fabric dye batches may vary.
