

NEBBIA RECYCLED

Nebbia is semi-transparent fabrics on double width with a thin stripe in a thicker yarn. The fabric is made in the flame-retardant material Trevira CS and up to 57% created of pre-consumer and post-consumer waste.

Nebbia works excellently in large windows or glass sections where the need for slight shielding exists.

This fabric is suitable when fire safety, ease of care and colour durability are priorities.

Please be aware that screen colours, printer colours and fabric dye batches may vary.
