

BRUNATE

Brunate is a double width hemp fabric woven in a sablé binding with slightly heavier threads which gives a stripy expression. The colour of the yarns comes out through a gentle oxygen bleach of the natural colour of hemp.

Our collection of hemp fabrics are all woven in the weaving mill in the north of Italy. The yarn we use are spun into yarns in the area close by the factory but the source of the hemp fibres we use are produced in China.

Use the width of the fabric as the width of the curtain for best results. This article may stretch depending on the natural character of the fiber. The hemp fiber is naturally uneven with slubs appearing giving a rustic effect.

Please be aware that screen colours, printer colours and fabric dye batches may vary.
