

ZELBIO

Zelbio is a hemp fabric woven with a satin binding on double width. The weft yarn varies slightly in thickness and creates a smooth yet varied surface. The colour of the yarns comes out through a gentle oxygen bleach of the natural colour of hemp.

Our collection of hemp fabrics are all woven in the weaving mill in the north of Italy. The yarn we use are spun into yarns in the area close by the factory but the source of the hemp fibres we use are produced in China. China has a long history of cultivating hemp for various uses, and hemp has been an important crop in Chinese agriculture for centuries

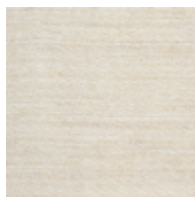

Use the width of the fabric as the width of the curtain for best results. This article will stretch depending on the natural character of the fiber. The hemp fibre is naturally uneven with slubs appearing giving a rustic effect.

Please be aware that screen colours, printer colours and fabric dye batches may vary.
