

RAGUSA RECYCLED

Ragusa is woven from jute and recycled cotton. The cotton threads are produced without the use of water, through mechanical recycling. The material is made from offcuts from the fashion industry and collected garments, giving new life to previously used resources.

The fabric is double-width and woven in a twill weave, creating an elegant diagonal pattern. With its soft drape and natural texture, Ragusa is perfect for curtains, bedspreads, and cushions.

This article may stretch depending on the natural character of the fibers. For best result use the width of the fabric as the width of the curtain. The yarns are uneven, with knots and slobbs that will be visible in the fabric.

Please be aware that screen colours, printer colours and fabric dye batches may vary.
